

Installing or removing the sample database to or from an evaluation of Service Accent

To install the sample database

You will need to remove the existing database from the installation. Use Windows Explorer to locate and delete all the files ending in **.BTR** from your AccentDB folder. By default, this is located in C:\Program Files\AccentDB.

Now insert the Service Accent CD in to your CD drive, then click the Start button in Windows, click Run and type

```
d:\database\setup
```

(replace d: with the drive letter of your CD drive)

Now follow the installation wizard through. By default, the sample database is installed.

Removing the sample database and installing a clean database

You will need to remove the existing database from the installation. Use Windows Explorer to locate and delete all the files ending in **.BTR** from your AccentDB folder. By default, this is located in C:\Program Files\AccentDB.

Run Service Accent; you will receive a message stating that Service Accent was unable to locate the database, and will prompt you to rebuild it. By clicking Yes, Miracle Service Accent will build a new, blank database for you.
